

ACCELERATED TACTICAL

A DIVISION OF ACCELERATED MEDIA TECHNOLOGIES

FUNDING BRIEF
REV — 28 JUL 2026

Mobile coffee pot — or Mobile Command Vehicle? The difference is **interoperability**.

Are your field operations in a bubble — or a dome?

BUBBLES BREAK. DOMES DON'T.

DOJ / OJP / BJA — GRANTS.GOV 0-BJA-2026-172641

\$3 BILLION
IN DOJ FUNDING

Source: Official NOFO, ojp.gov/funding/docs/bja-2026-172641.pdf — Assistance Listing 16.076

The FY2026 BIDEN Program funds agencies supporting 287(g) and HSTF enforcement operations — Category 2 covers technology and equipment, including mobile command platforms. AT builds the FOMCV that turns that funding into a hardened Tactical Dome. Eligibility requires an established or committed 287(g) partnership and active participation in HSTF operations or another major DOJ enforcement effort.

CURRENT

Round 3

Not yet posted. Funding continues on a rolling basis –
AT tracks each posting as it goes live.

TRACKING

Round 2 posted as Opportunity ID O-BJA-2026-172656. NOFO text: "Rounds may be added." Applications accepted on a rolling basis until funds are exhausted. Award period 36-60 months, starting Aug 1, 2026. Confirm current status against Grants.gov / JustGrants before an agency applies.

PROGRAM SNAPSHOT

ELIGIBLE APPLICANTS	State, county, city/township, special district, and tribal governments; state agencies with law enforcement responsibilities.
FUNDING CATEGORIES	1) Hiring — sworn & non-sworn personnel · 2) Technology & Equipment · 3) Temporary detention construction.
ELIGIBILITY GATE	Established or committed 287(g) partnership, plus full participation in HSTF operations or another qualifying DOJ enforcement effort. Letter of support from DOJ/federal HSTF member required.
COST SHARE	None required.

Note on figures — the \$3B figure is the NOFO's "Expected Total Amount of Funding." Some press coverage cites a \$3.5B ceiling for the broader BIDEN Reimbursement Fund; \$3B is the correct number to cite for this specific NOFO.

Nobody wants to operate in a bubble — and tactical bubbles break. AT can help build your agency's Tactical Dome, and the strength of those working inside it.

MISSION-SET TECHNOLOGY INTEGRATION — BUILDING THE DOME

Your tactical dome is only as strong as what holds it up. Every system below reinforces a different part of incident operations — air, ground, hazard, and network — not just radios and a folding table.

UAS Command & Control

Extends the dome upward — onboard drone launch, control, and video/telemetry ingest for aerial ISR.

Counter-UAS (C-UAS)

Reinforces the dome's perimeter — detection, tracking, and mitigation of hostile or unauthorized drone activity.

CBRN Detection & Monitoring

Extends the dome into hazard zones — chemical, biological, radiological, and nuclear sensor integration and onboard readout.

HAZMAT Response Support

Holds the dome at a safe standoff — command and monitoring capability for hazmat incidents and decon operations.

Ground Robotics

Extends the dome into spaces personnel can't safely enter — control stations and payload support for EOD/tactical ground robots.

Triple-Redundant, RF-Isolated Comms

The dome's structural core — cellular, SATCOM, and mesh/radio paths hardened against interference so no single failure takes the structure down.

RTIC / RTCC Feed Integration

Two-way — not just feeding the center, but seeing what they see.

WebEOC & Joint/Interagency Interoperability

Connects the dome outward — ties the on-scene picture into the county/state EOC common operating picture for joint operations.

Mission set isn't limited to the list above — if your agency runs it, tell us and we'll spec it. Platforms are configured to your agency's actual operational profile, not a fixed catalog.

HOW ACCELERATED TACTICAL SUPPORTS YOUR APPLICATION

Budgetary Quotes

Pricing structured to Category 2 technology/equipment language.

Vehicle Specifications

MCV configuration matched to mission set and jurisdiction scale.

Equipment Recommendations

C4ISR, comms, and incident command loadouts.

Technical Documentation

Spec sheets built to support Proposal Narrative sections.

Procurement Support

Technical specifications and documentation to support your agency's own procurement process.

Grant Planning Assistance

Timeline alignment across rolling NOFO rounds.

LET'S BUILD YOUR **GRANT PACKAGE** TOGETHER.
